9/2014 - 12/2018

CAN THO UNIVERSITY

GPA: 2.92/4

Objective

My short goal is to be able to learn new and trending technologies. With high ambition, I not only want to become a professional fullstack developer or a bridge engineer in the next 2 years, but also constantly cultivate any other experience related to information technology. My strength is dexterity and everything is carefully implemented. I do not have the skills to excel, but I have a strong sense of responsibility and a high level of effort. I also believe that I can complete my job, combined with specialized training and guidance based on my self-study and keen uptake skills.
